Conference Attendees**

Course Objective

Constructing high-quality asphalt pavements is the goal of our industry. You will learn to produce high-quality pavements by learning the basic principles of hot mix asphalt pavement construction and the inspector's responsibilities at the various stages in the construction process. You will develop a general understanding of hot mix materials, production, placement and compaction operations. Extra attention will be given to mix placement and compaction.

Who Should Attend

The workshop is designed for engineers, inspectors, technicians, and contractor personnel responsible for quality control of paving materials, mix design procedures, the inspection and operations of asphalt plants, and paving operations. Participation should include personnel from federal, state, county and local agencies, airport authorities, paving contractors, consulting engineers, and testing laboratories. The workshop is geared for the technician level and as a basic refresher course for the practicing engineer.

Workshop Instructors

This course is taught by two highly knowledgeable AI Regional Engineers.

2018 1-DAY SEMINAR:

Principles of Quality Hot Mix Asphalt Pavement Construction

“ Definitely effective and practical course.

I recommend this course to all involved with asphalt design and inspection.

Great project examples. ”

Learn the basic principles of hot mix asphalt pavement construction and the inspector's responsibilities at various stages in the construction process. Includes continental breakfast, breaks, lunch and a copy of AI's MS-22 Construction of Hot Mix Asphalt Pavements manual.

7.5 PDHs (CPE)
